| 25 oz Bottle Capacity |  |  |  |

Installation Instructions

## Installation Clearance Requirements

When installing the beverage cooler under a counter, follow the recommended spacing dimensions shown.

- For proper clearance of the electrical plug, allow at least 1 " of clearance at the back as shown in the diagram.
- An installation next to a wall will require a minimum 2-1/4" door clearance to accommodate the handle.
- The cabinet should allow at least 24 " for the width and $34-1 / 4^{\prime \prime}$ for the height to accommodate the beverage cooler.
- The power cable is located on the back right of the unit and has a length of 72 " to accommodate multiple outlet locations.
- Once you are ready to install the unit, you must adjust the feet to level the beverage cooler.
- The installation should allow the unit to be pulled forward for servicing, if necessary.
